My first ROOT interactive session

ROOT is based on CLING, a powerful C/C++ interpreter.

Blocks of lines can be entered within {...}.

Previous typed lines can be recalled.

Root > float x=5; float y=7;

Root > x*sqrt(y)

(float) 13.2288f

Root > for (int i=2;i<7;i++) printf("sqrt(%d) = %f ",i,sqrt(i));

sqrt(2) = 1.414214

sqrt(3) = 1.732051

sqrt(4) = 2.000000

sqrt(5) = 2.236068

sqrt(6) = 2.449490

Root > TF1 f1("f1", "sin(x)/x", 0, 10)

Root > f1.Draw()
